Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-57 are, drawn to apparatus, classified in class 601, subclass 5.
- II. Claims 62-68 are, drawn to a method of use, classified in class 128, subclass 898.

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the apparatus as claimed can be used to practice another and materially different process such as to increase users speed and stamina/endurance.

As to the two inventions being distinct the examiner notes that all of the elements claimed within the apparatus claims are not claimed in the method claims, there the apparatus of claims is not necessary to practice the method of claims 62-68. The methods of class 128/898 are not a required search for an apparatus classified in class 601/5.

In view of applicants remarks directed toward the accuracy of the examiners classification of the apparatus and method. The examiner a reviewed the requirement and determined that the areas of classification should be narrowed to the above listed areas of restriction. The examiner feels that a clarification of the restriction requirement is necessary for the record and a proper restriction.
